1. Experiments are at present taking place in telephoto transmissions between Karlsruh-Königsbrunnshausen and Beelitz, formerly main reception station for transoceanic services and now a Soviet experimental station.

25X1

3. The Russians are experimenting with frequency modulation and transmission of half shade pictures (Halbtönenbilder) over multiple channels. They are aiming at higher speeds and working on the elimination of fading.

25X1

6. The Russians have asked Telefunken to set up a production center for high frequency instruments in the Lichtenberg-Weissenhof area.
